
🚀 Go-Live Announcement – 3rd April 2025

🎯 Greenland + All Connected Solutions

We're excited to announce the latest deployment going live on **3rd April 2025** – this includes important updates for **Greenland (www.sammisassat.gl)** and all other integrated systems. Here's what's rolling out:

🌍 Greenland (www.sammisassat.gl)

✅ Key Highlights

1. **Child Certificate Implementation**
   👤 Feature delivered by **Falgun**
   📄 Enables generation and handling of child certificates.
2. **Timeout + Blue Screen Issue Resolved**
   🛠️ Users will no longer face the frustrating timeout → blue screen scenario.
3. **100% Greenlandic Translation**
   💬 All content is now fully translated into **Greenlandic**, both:
   - **Before Login**
   - **After Login**
4. **Sales Packages from Colosseum Displayed on Sammisassat**
   🛒 All relevant **sales packages** from Colosseum will now be visible on www.sammisassat.gl
5. **Membership Display from Gladiator**
   👥 Membership information synced from **Gladiator** and now visible on the platform.
6. **Hold (Team) Display from Gladiator**
   👫 "Hold" (team) data now also pulled and displayed from Gladiator.
7. **Membership Purchase List (Post Login)**
   🧾 After logging in, users can now view their **membership purchase list**
   • Includes Excel export
   • ❌ No actions/buttons attached (view-only mode)
8. **Single Website Handling for Sammisassat**
   🌐 Only **one designated website** is now part of www.sammisassat.gl
   👨‍💻 Controlled and maintained by **Jalpesh** and **Hardik**

🔔 What to Expect

These changes aim to enhance the **user experience**, ensure **platform consistency**, and improve **performance** across the board.

Please make sure to test all relevant flows once the update is live, especially for:

- Language consistency
- Membership and Hold visibility
- Post-login purchase data and export functionality

🙌 Acknowledgements

Special thanks to:

- **Falgun** – for Child Certificate integration
- **Hardik** – for managing site database ownership logic
- **All teams** involved in translations, sync, QA, and deployment 💪

☕ Final Note

We're live on April 3rd – mark your calendars and let’s make this release a smooth one!

If you notice anything odd post-deploy, raise it ASAP.
Until then… enjoy the calm before the code storm. 🌊💻
